SUMMARY

Recent Computer Science graduate and NCAA student-athlete with hands-on experience in software development, AI-assisted automation, database management, and IT support. Skilled in building web applications, dashboards, internal tools, and AI-powered prototypes using Python, Flask, JavaScript, APIs, and LLM-based tools. Strong foundation in programming, operating systems, troubleshooting, full-stack development, and technical problem-solving. Brings strong teamwork, adaptability, and time-management skills developed through technical projects, IT experience, and collegiate athletics.

EDUCATION

THE UNIVERSITY OF MARY HARDIN-BAYLOR
Bachelor of Science in Computer Science

Belton, Texas
May 2026

- GPA: 3.862/4.0
- Recognitions: Provost Honors Role (2 semesters), Dean's List (4 semesters)
- Relevant Coursework: Artificial Intelligence, Computer Security Database Theory and Applications, Telecommunications and Networking, Computer Organization and Architecture, Operating Systems, Scientific Writing, Data Structures, Web Design, Algorithms and Analysis

TECHNICAL SKILLS & CERTIFICATES

Languages: Java, Python, C/C++, HTML/CSS, JavaScript, PHP, Prolog, Machine Language

Tools: Visual Studio, VS Code, Wireshark, VirtualBox, Docker, Git/GitHub, Scikit-Learn, TensorFlow, SQL, MS Access, WinSCP, PuTTY, REST APIs

AI & Automation: ChatGPT, Claude, Codex, Gemini, GitHub Copilot, OpenAI API, local LLMs, AI coding agents, prompt engineering, workflow automation

Certifications:

- Machine Learning with Python Professional Certificate — Anaconda
 - AI Test Automation Professional — TestMu
- Career Essentials in GitHub Professional Certificate — GitHub
 - Docker Foundations Professional Certificate — Docker

EXPERIENCE

The University of Mary-Hardin Baylor
Information Technology Assistant (Part-Time / Work Study)

Belton, Texas
August 2025-May 2026

- Collaborated with IT technicians to install, configure, and maintain computer hardware and peripherals, including desktops, laptops, printers, and network devices.
- Managed office technology relocation, including setting up workstations and network connectivity to ensure seamless device integration and collaboration.
- Assisted with software installation, updates, and troubleshooting for operating systems and university-approved applications.
- Diagnosed and resolved common IT issues such as login problems, system errors, and device malfunctions.

Web Development Intern

December 2024-May 2025

- Developed a personal brand website using HTML, CSS, and JavaScript
- Built a Major Finder web application using a JSON data structure to recommend academic majors based on user input
- Utilized Visual Studio Code for development, testing, and debugging

Database Management Systems Project

December 2024-May 2025

- Designed and implemented a student database using Microsoft Access to track and record IDs, grades, and coursework
- Created relational databases using MySQL through PuTTY terminal access
- Developed a PHP and MySQL web application hosted on Apache to perform CRUD operations
- Deployed and tested applications within a virtual machine environment

ADDITIONAL EXPERIENCE

Dakar Projects — Lead AI Solutions Developer & Consultant

Independent Technology Practice

2026 – Present

- Deliver AI integration and automation consulting for small businesses and individuals, analyzing operational inefficiencies and leveraging large language models to build tailored solutions for workflow modernization, productivity, and document processing.
- Develop client-facing AI and automation prototypes, including an AI receptionist system, an operations dashboard, and PDF rendering workflows to improve customer intake, business tracking, and document presentation.
- Build and test custom websites, dashboards, internal tools, and AI-powered applications using Python, Flask, JavaScript, HTML/CSS, Docker, secure API integrations, cloud services, local development environments, AI coding assistants, and LLM-based agents.

NCAA Men's Basketball Student-Athlete

August 2022 – May 2026

- Committed approximately 30 hours per week of athletic commitments with full-time coursework
- Demonstrated teamwork, accountability, leadership, and time management

Summer Camp Counselor, Lifetime Fitness, Allen, TX

Summer 2023/2024

- Led groups of campers ages 4-10 with a fun, positive, and outgoing attitude
- Engaged campers in interactive activities including organized games, arts & crafts, swimming, rock climbing, and weekly field trips
- Promoted nutrition and ensured each camper's safety
